Los Angeles, CA 90064

Dear Ron:

On behalf of the KOCE-TV Foundation, Foundation Board Chair Jo Ellen Allen, and the staff and viewers of KOCE-TV, I am writing to thank you and KXLA for your tremendous kindness to us during our technical disaster on Mt. Wilson. Your willingness to allow us to use your back-up antenna for our analog transmissions was an amazing gesture of cooperation and friendship within our consortium. You truly saved our bacon.

Were it not for your generosity, KOCE would have been relegated to a small, unstable transmission facility at La Habra Heights that is totally insufficient in providing coverage to Orange County, let alone the rest of the market. Everyone here at KOCE is singing your praises and our Foundation Board verbally expressed its thanks in our quarterly board meeting yesterday.

Also key in getting our transmission problems resolved were Francis Wilkinson of KJLA who helped keep the process moving, Ken Brown your chief engineer who enabled the antenna swap, and Merrill Weiss who added expertise and kept us legal with the FCC. On our end, Roger Yoakum and Bruce Reed provided the expertise and leadership we needed.

It was a true team effort, the tone for which was set by your actions.

Please know we are in your debt and stand ready to follow your example in helping our consortium members all find success as we work together.

Warmest regards,

Mel Rogers  
KOCE-TV Foundation
