### PERTENANT ISSUES AND PROGRAMMING:

A college degree is worth an extra \$23,000 a year in salary. According a report released by the government, college graduates made an average of 51-thousand-dollars in 2004 while those with a high school diploma made 28-thousand-dollars. High school dropouts made an average of 19-thousand dollars. Bottom line? Hang in there students! It literally pays to study, just ask the people with graduate degrees who made an average of 78-thousand dollars in 2004.

And it all starts in pre-school... according to a recent study, the majority of California kindergarten teachers say Exposure to preschool is ``very'' important for children before they enter Kindergarten. The poll is part of the ``praise for preschool'' report, made by a nonprofit organization that Wants publicly funded preschool available to all children statewide.

Welcome back to southern California life's special spotlight show. Our showcase of big bear lakes continues with a look at some fine dining you might not expect to find in a mountain town. Chad Rohn shows us a delicious side of the popular mountain get-a-way.

We all know about earthquakes here in California, hurricanes in the south and tornados in the Midwest. The question is, is there a safe haven somewhere in the country? According to a new study experts agree that Blanding, Utah may be one of the safest places in the United States from a disaster. As for California? Santa Barbara ranks high because it's far from damaging earthquake faults. So, do you ever wonder where you should be living? Well... You can find out with an easy test... Just go to [findyourspot.com](http://findyourspot.com) and find out what city is the best match for your personality. You may be surprised by the results.

Can you imagine well-defined wrinkles or creases becoming smooth...? And your face becoming more rested and younger looking? It's happening more and more with inject able wrinkle fillers.

## SOUTHERN CALIFORNIA LIFE

---

One of the newest such fillers is called radiesse. Physicians say it's safe, long-lasting, and an outstanding alternative to natural collagen. At the medical and skin spa in Indian wells... getting rid of wrinkles... Sagging skin is a common patient-request. As we age a bunch of things happen, none of which are very good actually the skin falls in like a curtain your face seems to fall in and you want to open it up.

Doctor Richard Foxx uses one of the newest treatments to provide smooth skin. Radiesse was first introduced about seven years ago... And has proven to be a safe and effective alternative for those patients wishing to preempt plastic surgery and avoid the potential side effects of bovine and solid implant materials. It uses calcium... The same calcium in your teeth and bones but it's made in the laboratory so there is no allergic problem.

By supplementing your skin's own depleted collagen with radiesse, you can expect to see smoothed-out wrinkles and scars. Also... Improvement in the appearance of deeper frown lines and nasal furrows. Radiesse is a safe, effective, time-tested, non-surgical wrinkle treatment that provides immediate and comfortable results. Even under the eyes.

As we age your cheeks sag and there's a bit of a hollow. You can put radiesse in there very effectively and erase that and make your face that much more youthful. Radiesse is injected into the wrinkle, through a tiny needle, and placed just under your skin. Unlike other fillers, radiesse is not absorbed by your system. Therefore, there's no need to over-fill the wrinkle. Your results are immediate and long lasting. We can now do a meaningful correction and have it last longer than just a couple months. It lasts a year and a half to two years.

Depending on the area treated, most of your correction may last from 18 months to two years. It can even be used on the bridge of the nose. For more information... Contact Doctor Richard Foxx at 760 674-4106.

It is hard to grasp that for 10-years toddlers around the world have learned their first signs, colors, shapes and words with the baby Einstein DVD. At the downtown Disney hall baby Einstein creator Julie Clark remembered the long journey from stay at home mom to head of an empire.

Athletes are always looking for the next challenge. In this next story, mark Kinney finds a group of athletes who overcome incredible odds.
